Software engineer with hands-on experience across mobile applications and backend systems. I design application architecture, lead small engineering teams, and ship reliable, maintainable products from prototype to release.

EXPERIENCE

Brokerage & REIM · Location-based AR real estate platform · Morocco — Sep 2022 – Aug 2026

Senior Mobile engineer — Nov 2022 – Aug 2026

- Owned application architecture, defining how property discovery, augmented reality views, and supporting services work together.
- Led mobile app development and service integration; set priorities and coordinated product delivery.
- Investigated crashes and device-specific issues; prepared app builds and managed releases for testers.

Mobile engineer — Sep 2022 – Nov 2022

- Developed features for a real estate app that lets users explore properties through location-based augmented reality.
- Added remote app settings and push notifications; resolved performance and device-specific issues.

Software engineer · HomeAR Backend — Aug 2023 – Jan 2024

- Developed property listings, nearby-property search, and seller and agency account management.
- Added saved-search matching, price-drop alerts, real-time notifications, and listing moderation.

Freelance

Mobile engineer · Video Downloader - Video Saver — Dec 2022 – Jul 2025

- Developed a mobile app for downloading, organizing, and playing media offline.
- Added automatic video detection, pause and resume controls, and password-protected file storage.
- Implemented local and cloud data storage, push notifications, and crash monitoring.

Software engineer · Network Reliability Analyzer — Sep 2025 – Jan 2026

- Built a tool to evaluate communication network reliability under component failures.
- Modeled outage scenarios and compared fixed and adaptive routing across two congestion management models.
- Created network diagrams and availability charts to present and compare the analysis results.

Software engineer · Media Processing Service — Jan 2025 – Sep 2025

- Developed a service for downloading media, converting audio, and extracting file information.
- Handled long-running processing tasks and reused completed files to avoid repeat work.
- Added live progress updates, time-limited download links, and service health monitoring.

TECHNICAL SKILLS

Languages	Kotlin, Python, Dart, C#, SQL
Frameworks	Flutter 3.x, Jetpack Compose, Koin, BLoC, FastAPI, NetworkX
Architecture	MVVM, event-driven
Engines & AR	Unity, ARCore
Data & storage	Room, SQLite, Cloud Firestore, Redis, Hive, Amazon S3
Jobs & APIs	Celery, REST APIs, WebSockets
Firebase	Remote Config, Cloud Messaging, Crashlytics
Tools	Git, Docker, Sentry

EDUCATION & LANGUAGES

1337 Coding School (42 Network) · Software Engineering Program · Khouribga, Morocco — Nov 2021 – Sep 2022

Languages: Arabic (native) · English, French (professional working proficiency)
