PORTFOLIO ismailrq.is-a.dev

Senior full stack engineer with experience building mobile applications and backend services. I work across user-facing features, application architecture, and service integration, and lead development from planning through release.

EXPERIENCE

Brokerage & REIM · Location-based AR real estate platform · Morocco — Sep 2022 – Aug 2026

Senior Full Stack Engineer — Nov 2022 – Aug 2026

- Owned application architecture and development priorities across the real estate mobile app and backend services.
- Led delivery of mobile features and backend integrations, coordinating work across both parts of the product.
- Resolved AR initialization, tracking, and platform-specific issues; coordinated app builds, service updates, and tester releases.

Full Stack Engineer — Sep 2022 – Nov 2022

- Embedded Unity/C# in Flutter for iOS and Android, with two-way communication and lifecycle management.
- Implemented AR property discovery with ARCore Extensions, Geospatial API, geolocation, and Google Maps.
- Built HomeAR's backend for property listings, nearby search, and seller and agency accounts.
- Added saved-search matching, price-drop alerts, and moderation, with real-time notifications using Socket.IO and Redis.
- Deployed services with Docker and Nginx; secured server access and traffic with Fail2ban, Cloudflare, and UFW.

Freelance

Software engineer · Network Reliability Analyzer — Sep 2025 – Jan 2026

- Built a tool to evaluate communication network reliability under component failures.
- Modeled outage scenarios and compared fixed and adaptive routing across two congestion management models.
- Created network diagrams and availability charts to present and compare the analysis results.

Software engineer · Media Processing Service — Jan 2025 – Sep 2025

- Developed a service for downloading media, converting audio, and extracting file information.
- Handled long-running processing tasks and reused completed files to avoid repeat work.
- Added live progress updates, time-limited download links, and service health monitoring.

Software Engineer · Web Browser — Dec 2022 – Jul 2025

- Developed a mobile app for downloading, organizing, and playing media offline.
- Added automatic video detection, pause and resume controls, and password-protected file storage.
- Implemented local and cloud data storage, push notifications, and crash monitoring.

TECHNICAL SKILLS

Languages	TypeScript, Python, Kotlin, Dart, C#, SQL
Frameworks	React, Node.js, Express, FastAPI, Flutter, Jetpack Compose, Koin, BLoC, NetworkX
Architecture	MVVM, event-driven
Engines & AR	Unity, ARCore, Geospatial API
Data & storage	PostgreSQL, Redis, SQLite, Room, Cloud Firestore, Hive, Amazon S3
Jobs & APIs	Celery, REST APIs, WebSockets, Socket.IO
Firebase	Remote Config, Cloud Messaging, Crashlytics
Tools	Git, Docker, Nginx, Sentry, Fail2ban, Cloudflare, UFW

EDUCATION & LANGUAGES

1337 Coding School (42 Network) · Software Engineering Program · Khouribga, Morocco — Nov 2021 – Sep 2022

Languages: Arabic (native) · English, French (professional working proficiency)
